Test Case ID	Title	Objective	Preconditions	Description/Steps	Priority	Expected Result	Actual Result	Status	Notes
TC001	Validate Sucessful Sign In With Correct Credentials	To ensure Sign in functionality works with valid username and password	User is registered with the application	1. Navigate to sign-in page 2. Enter a valid registered email 3. Enter corresponding password 4. Click Sign-in	High	User is logged in and into the front page	Users information is stored into the database and can be seen from phpMyAdmin. User can sign in with their credentials	Passed	
TC002	Attempt to sign in with a valid email and invalid password	To verify system's response when an invalid password is used.	User is registered with the application	1. Navigate to sign-in page 2. Enter a valid registered email 3. Enter an incorrect password 4. Click Sign-in	High	User should receive an error message stating "Invalid credentials"	Users information is stored into the database and can be seen from phpMyAdmin. User gets invalid response	Passed	
TC003	Check the password visibility toggle feature	To ensure that the password visibility toggle changes the password input field from hidden to visible	None	1. Navigate to sign-in page 2. Enter password in the password field 3. Click the button to toggle password visibility	Medium	The password should be visible and the icon should change	The system works right. Password is visible when toggle button is clicked. Password shows up as black dots when button is recliked.	Passed	
TC004	Attempt to sign in with empty email and password fields	To verify the system's response when sign-in is attempted with both fields empty	None		High	The system should prevent submission and display an error message for missing credentials	The system works right. It says "Please fill out this field" when attempting to sign in without email or password	Passed	
TC005	Attempt to sign in with empty email but filled password	To verify the system's response when sign-in is attempted with email field empty	None	1. Navigate to sign-in page 2. Leave email area empty but password field filled 3. Click Sign in button	High	The email area should give a warning that this field needs to be filled when attempting to sign in.	The system works right. It says "Please fill out this field" when attempting to sign in with email field not filled.	Passed	
TC006	Attempt to sign in with email field filled but empty password field	To verify the system's response when sign-in is attempted with password field empty	None	1. Navigate to sign-in page 2. Leave password area empty but email field filled 3. Click Sign in button	High	The password area should give a warning that this field needs to be filled when attempting to sign in.	The system works right. It says "Please fill out this field" when attempting to sign in with password field not filled.	Passed	
TC007	Validate the password reset functionality	To ensure that the "Forgot Password?" link allows users to initiate a password reset process	User has an existing account with a registered email address	1. Navigate to sign-in page 2. Click on "Forgot Password" 3. Enter Registed Email Address in provided field 4. Submit with new password	Medium	User receives a password reset email with instructions	Do not have a password reset step yet	Passed	
TC008	Attempt password reset with an unregistered email address	To verify that the password reset process does not proceed with an unregistered email	None	1. Navigate to "Forgot Password" 2. Enter email associated with the account 3. Submit request	Medium	The system should inform the user that the email address is not recognized	Do not have a password reset step yet	Passed	
TC009	Validate the "Remember Me" functionality	To ensure that the "Remember Me" checkbox keeps the user credentials eveb after closing the browser	User must log out if previously logged in	1. Navigate to Sign-in Page 2. Enter valid credentials 3. Check "Remember Me" Box 4. Log In 5. Close Browser 6. Reopen browser and navigate to website	Medium	User should have credentials saved and not be prompted to enter credentials again	Email is saved, however, password is not saved.	In Progress	Cookies must be enabled in the browser to test this functionality. Work on figuring out how to save password.
TC010	Validate login persistence without selecting "Remember Me"	To confirm that users are not remembered if they do not select "Remember Me"	User must log out if previously logged in	1. Navigate to Sign-in Page 2. Enter valid credentials without clicking "Remember Me" Box 3. Log In 4. Close Browser 5. Reopen browser and navigate to website	Medium	User should be prompted to log in again	User's credentials are not saved when "Remember Me" box is not checked.	Passed	
TC011	Check whether user is able to log in with clicking checkbox "Accept Terms of Conditions"	To confirm that users agree to the term of conditions and the user can proceed to the website	User must log out if previously logged in	1. Navigate to Sign-in Page 2. Enter valid credentials 3. Check off Terms of Conditions Box 4. Sign in	Medium	User should be able to sign in with terms of conditions box checked off	User is able to proceed with terms of conditions box checked off	Passed	Add information to Terms of Condition
TC012	Check whether user is able to log in with clicking checkbox "Accept Terms of Conditions"	To confirm that without "agreeing" or checking the box to the term of conditions, the user cannot proceed	User must log out if previously logged in	1. Navigate to Sign-in Page 2. Enter valid credentials 3. Do not Check off Terms of Conditions Box 4. Sign in	Medium	User should not be able to sign in with terms of conditions box not checked off	User is not able to proceed with terms of conditions box checked off	Passed	Add information to Terms of Condition
TC013	Check an email that doesn't adhere to standard email format rules	To confirm whether entering an email without "@" symbol works	None	1. Navigate to Sign-in Page 2. Enter email without @ symbol 3. Try to sign in	High	Error message indicating that the email doesn't exist	User gets a prompt saying "Please include an @ in the email address"	Passed	
TC014	Check an email that is not registered in the system	To confirm whether you can sign in without a registered email	Don't use an email that is already registered	1. Navigate to Sign-in Page 2. Enter email thats not registered 3. Sign in	High	Error message indicating that the email doesn't exist	User is not able to log in	Passed	
TC015	Check SQL Injection Test	To ensure there is no database errors	None	Enter SQL code in the email or password fields to test for SQL injection vulnerabilities	Low	Input should be sanatized and no database error or unexpected behaviour should occur		In Progress	
TC016	Cookie Security Test	To ensure cookies adhere to security standards	None	Verify that any cookies set, especially with "Remember Me", are secure and have appropriate attributes like HttpOnly, Secure, and SameSite	Low	Cookies adhere to security standards		In Progress	
TC017	Brute Force Attack Test	To ensure security	None	Attempt to log in repeatedly with incorrect credentials to see if the account locks or if there is any rate limiting	Medium	The system should lock the account or block the IP address after several failed attempts		In Progress	
TC018	Responsive Design Test	To be able to acess page from different devices	Have a different type of device	Access the page from different devices with various screen sizes to check layout and functionality	Low	Page elements adjust appropriately for different screen sizes		In Progress	
TC019	Data Validation Test	To check if input is valid on both client and server sides	None	Check that all input is validated on both client and server sides	High	Inputs are correctly validated, and no improper inputs are accepted		In Progress	
TC020	Weak Password Test	To check whether a user can sign up with a weak password	None	Create an account, enter a weak password (one without a symbol and 8 characters), and press enter	High	User should not be able to sign up with a weak password	User gets an alert when attempts to sign up with a weak password	Passed	
TC021	Strong & Moderate Password Test	To check whether a user can sign up with a strong or moderate password	None	Create an account, enter a weak password (one that fills all requirements such as uppercase letter, lowercase letter, a digit, a symbol and at least 8 characters), and press enter	High	User should be able to sign up with a strong and moderate password	User is able to proceed to next page that says you are signed up and can click on sign in link to be redirected	Passed	
TC022	Reset Password Test	To check whether both passwords meet and for security reasons	Have an account made	Click forgot password, then reset link, then enter new password and confirm the password	High	User should be able to proceed if both passwords are right	User is able to proceed and password is resetted	Passed	
TC023	Reset Password Test#2	To check whether if new password is not same as confirm password	Have an account made	Click forgot password, then reset link, then enter new password and confirm the password	High	User should not be able to proceed if both passwords do not matchh	User is not able to proceed since both passwords do not match	Passed
